Subject: Re: List of Compounds and QL

I don't see Strontium or Uranium on the list. I would suggest the following:

Sr by 200.7 RL = 200ppb

U by 200.8 RL = 10 ppb

robin

Subject: List of Compounds and QL

We need low level detection for upcoming sampling and analysis for Dimock residential wells.

Attached are the Reporting Limits that we "routinely" supply for sample analysis. We may be supplying lower limits than what is specified in the spreadsheet.

Please look over the list and let me know what your levels will be and if this is a complete list of compounds for your analytical group. ASAP

Jennie -- I can create a spreadsheet for the Glycols.

P.S. -- I did not send this to the inorganic folks (Anions, TDS, TSS, nitrate/nitrite, TP, etc.) as these are not expected to change. But I could also send to them.
